

# Too good for hanging?

**Product:** Laughing Pirates air freshener/odor neutralizer. Advanced solid gel formula provides continuous action for up to six months.

**Application:** Simply hang in marine heads, lockers, other cabin and crew areas where freshness is desired.

This first pirate-powered, marine strength air deodorizing and freshening product works for up to six months thanks to its unique solid gel polymer with micro-encapsulated fragrance and deodorizer compounds. The Laughing Pirate swings freely to work even faster and more effectively than jar or container products, and doesn't rely on someone having to find and use a spray. Both of these can spill, or go tumbling even in a moderate sea. The Laughing Pirate works continuously, with a pirate's ruthless effectiveness when hung freely by the integrated "noose." It leaves your head and crew areas smelling fresh, with a choice of three colors each featuring a long-lasting fragrance: Bath Night in Barbados (blue), Orchid of Ocracoke (red), and Citrus Swing (gray).

**Usage:** Leave it closed in its clamshell package until ready to use. Hang by the integrated noose to control odors where you need it most. Optional vent clips can be inserted into back of character to use clipped in front of circulating vents and fans. Replace every three to six months as needed.

Avoid contact with eyes and finished surfaces, as it may stain plastic, vinyl, painted or varnished surfaces. Not for use inside marine sanitation systems.  
KEEP OUT OF REACH OF CHILDREN AND PETS.
